**Science Tutoring**

Is your child struggling in science class and not making sense of the lessons? Don't worry, help is just a few steps a way. Starting the week of June 18, science tutoring is available after-school for four days per week, with the exception of Wednesdays, from 4:00 – 5:00 P.M. Montgomery's own science teachers, Mr. Ruffin and Ms. Abella, will be working with selected students. If you would like for your child to access this support, please let one of the teachers mentioned above know of your interest. Students will be enrolled in this free program based on space availability and enrollment in the 6 to 6 program is necessary. Please call the school for more information at (858) 496-8330.
